CSE 40373: Home Work Project 3

Due 4/15/3009. Late submissions will not be accepted
Group effort

Report:

We investigated the behavior of Lotus Bluehouse for our in-class demonstration. Notre Dame subscribes to Webex as a collaboration service. More information about WebEx @ ND is available at http://oit.nd.edu/webex/index.shtml. There are several online demos further down in the page (http://oit.nd.edu/webex/index.shtml#what_is_webex). Consider a collaboration scenario that you were involved in the past (could be a project meeting with your course project partners, group meeting at a company that you interned etc.). Describe your collaboration scenario and how Webex could've helped you. Also, describe features of Webex which would've been unhelpful for you. Also report how you would modify Webex to help you in your collaborations. Write the report in under one page.
